

Industry Supporter **prospectus**

December 2020

Australian
Carbon Industry
Code of Conduct

Background

Australian governments and corporations are supporting substantial investments in emission avoidance and carbon reduction activities. There are hundreds of projects and over \$2billion already invested in domestic compliance and voluntary carbon markets. As these evolve and mature, market participants, consumers, regulators and policymakers have called for an independent framework to drive industry best practice, build integrity, ensure consumer protection and build trust with stakeholders, including Native Title holders, NRM bodies, land managers and project owners.

On the 1st of July 2018, the Carbon Market Institute (CMI) began implementation of one of the world's first voluntary domestic carbon Codes of Conduct, designed to promote market integrity and consumer protection. Since then Signatories have grown by 67 per cent, now representing a significant portion of land based ACCU issuance. This prospectus seeks your organisation's support to sustainably resource the Code. Led by CMI and developed with input from a wide range of industry, community and government stakeholders, the Code:

- promotes best practice within Australia's carbon reduction and carbon sequestration industry and has been developed in accordance with [ACCC voluntary industry coded of conduct guidelines](#);
- provides guidance and accountability for industry practitioners and service providers undertaking carbon offset projects including under the Australian Government's Emissions Reduction Fund (ERF) and other Voluntary Offset Schemes, such as the Gold Standard and Verified Carbon Standard;
- commits Signatories to developing and conducting their business in line with industry best practice and interacting with clients and other stakeholders in a professional and ethical manner;
- is already a core eligibility requirement for access to the Queensland Government's [Land Restoration Fund](#), and its contribution has frequently been recognised by the Clean Energy Regulator and can play a role in assuring integrity in other states; and
- will be linked with Commonwealth Government considerations regarding a market duty of utmost good faith and application of fit and proper person assessments.

Implementation

The Code commenced with a **“Foundation Stage”** for a period of two years. The Code and CMI as Administrator, has recently undergone an independent review, that through detailed stakeholder engagement provided recommendations for a transition to the **“Operational Stage”**. With governance reviews in the wake of the King Review, 2020/21 will be a Transitional Year which will include the establishment of an independent Code Review Panel. Various elements of the Code will only come into effect at the commencement of the Operational Stage, including carrying out compliance audits, the investigation of complaints and breaches, and enforcement of sanctions.

Code Administration

The Code is administered by CMI who provides guidance to all Signatories about the operation and requirements of the Code, and covers activity (projects) that have started from 1st July, 2018. The CMI is also responsible for:

- managing the administration process relating to Signatories;
- reviewing compliance against the Code;
- overseeing promotion of the Code;
- developing training and supporting material on the Code to assist Signatories to comply with the Code;
- handling complaints in accordance with the process for handling complaints/alleged breaches;
- preparing an annual report on the Code's operations;

During the Operational Stage, the Administrator's responsibility will extend to establishing and funding an independent panel, undertaking compliance audits and initiating enquiries into compliance, investigating complaints and breaches, and enforcing sanctions.

Benefits to Industry Supporters

As corporate net-zero and negative emission commitments continue to grow in Australia, it will be critical for corporate entities to actively ensure the quality and integrity of their carbon credit portfolios. The Code provides industry investors with a crucial platform for both the standardisation of national best practice and deeper integrity in Australia's carbon market as it seeks global opportunities under the Paris Agreement. Support for the Code is an investment in risk mitigation. It will translate to increased project transparency, strengthened social licence, and greater engagement and communication between stakeholders. Through their investment in the Code, Industry Supporters can communicate to their investors, shareholders, employees, clients and consumers that they are supporting carbon project best practice and leading communication of social, economic, Indigenous and environmental co-benefits.

The Code can also be a platform for supporting contractual and regulatory streamlining and standardisation. Industry Supporters can join with the Code Administrator, Government Partners and Code Signatories through the proposed Advisory Committee and other initiatives. Together we can build a carbon industry of the scale and enduring integrity necessary for Australia to fulfil its potential as a global leader in negative emission technologies.

Code Supporter Status

The Code Supporter Status framework below, enables industry stakeholders to endorse the Code and formally support carbon market development – as a *Code of Conduct Industry Supporter*.

Industry Supporter Market Benefits:

- Provision of an independent consumer protection framework which provides transparency and accountability, protecting stakeholders including Native Title holders, natural resource management bodies, land managers, project owners and demand-side consumers;
- Enabling confidence in the integrity of corporate investment in abatement activity – that they do not have unintended adverse consequences, and that they do no net harm;
- Transparency and accountability around the operating standards of carbon project developers and carbon service providers to both supply and demand sides of the market;
- Reduced risk of regulatory and legislative non-compliance;
- Confidence and assurance of the longevity and level of risk of carbon investments;
- Protection and enhancement of the reputation of the carbon industry;
- Protection and enhancement of community trust between carbon market stakeholders; and
- Commitment to supporting the continuous improvement of best practice carbon project operation.

Industry Supporter Status Benefits:

- Membership of the Code Administrator's Industry Advisory Group, with inputs into:
 - Appointment of the Code's Independent Review Panel; and
 - High-level advice to the Administrator on:
 - i. Consumer protection needs of both demand-side and supply-side markets; and
 - ii. Stakeholder education, outreach and training needs.
- Promotion of role as an Industry Supporter, including the following activities across digital/online channels:
 - Recognition of status and commitment to carbon market integrity & consumer protection; and
 - Code channel links to examples of corporate demonstration of support for best practice carbon market integrity.
- Use of Industry Supporter brandmarks & support materials.
- Option to contribute supporter-specific information to Code Annual Report
- Engagement with the Code Administrator regarding improvements to the application of the Code, including on Independent Review recommendations relating to standardised contract guidance/details; and
- Access to Code education and outreach materials.

Annual (FY) Code Supporter rate.....\$10,000 + GST
